HONEYWELL INTRODUCES IN-FLIGHT E-MAIL SUPPORT FOR WI-FI ENABLED BLACKBERRY SMARTPHONES

Secure, always-on access is available from take-off to landing

EBACE, GENEVA, May 20, 2008 – Honeywell **(NYSE:HON)** announced today the availability of its Honeywell In-Flight Messaging Service accessible via Wi-Fi® enabled BlackBerry® smartphones from Research In Motion (TSX:RIM) (Nasdaq:RIMM), through Honeywell's OneLink™ satellite communications services.

The Honeywell In-Flight Messaging Service can configure Swift64 or SwiftBroadband satcom and router equipment to enable customers with Wi-Fi enabled BlackBerry smartphones to send and receive e-mail while onboard business jet aircraft. This service provides the most efficient use of existing Inmarsat satellite capabilities to enable BlackBerry e-mail and PC-based internet applications while in flight.

The Honeywell In-Flight Messaging Service provides continuous, uninterrupted always-on access to e-mail while on the ground and from take-off to landing for Wi-Fi enabled BlackBerry smarpthones. Honeywell can configure systems for general access to all passengers or for secure access by designated passengers.

"This new Honeywell In-Flight Messaging Service capability coupled with satellite technology is a tremendous advancement in improving cabin communications utilization and efficiency in all phases of aircraft operation," said Rob Wilson, President, Honeywell Business and General Aviation. "This is the number-one communication service that Honeywell customers have asked for, and we are able to deliver this enhanced capability that supports BlackBerry smartphones, plus regular PC internet traffic, in a very efficient and cost effective manner"
