HONEYWELL AND SATCOM DIRECT OFFER COMPLETE CABIN CONNECTIVITY

Now Available: A Complete Flight Operations and Cabin Communications Service

NBAA, ORLANDO, October 4, 2008 -- Honeywell (NYSE: HON) and Satcom Direct Inc. have joined forces to offer aircraft operators a single flight support and cabin communications service.

“Honeywell – a leader in cockpit and cabin management systems – and Satcom Direct, the innovative leader in global satellite communications, will now offer complete satellite communications and flight support services,” said Rob Wilson, President, Honeywell Business & General Aviation. “This new collaboration enables us to deliver proven technologies and customer service capabilities that provide more value to our customers, in effect, a single source solution for staying connected seamlessly while in flight.”

“Working with Honeywell allows us to combine Satcom Direct’s strength in delivering satellite-based service solutions with the integrity and recognition of the Honeywell name,” said Jim Jensen, founder and owner of Satcom Direct. “Our focus at Satcom Direct is to deliver unparalleled technology and customer support that ensures private aviation travelers and all of our customers receive the connectivity they need, when and where they need it.”

Purchasing flight support and cabin communication services as a comprehensive package helps operators avoid the time and cost of managing multiple contracts and suppliers. The services in the package include accurate flight planning information, reliable e-mail and data communication, and satellite TV.

-MORE-

2 -- Honeywell and Satcom

This joint effort offers operators increased flexibility to choose the services they need to meet their specific business requirements. In addition to a complete, single source solution, they also have the option to continue buying the services they need separately from Honeywell and Satcom Direct.

As part of the agreement, Satcom Direct also will take over the support and account management of Honeywell's existing cabin services, including OneLink, OneView and Jetmap2.

Wilson said, "Honeywell customers value OneLink, OneView and JetMap2 communication solutions. Our partnership with Satcom Direct includes the support and service of these programs. This is a win-win for aircraft operators who benefit from Satcom Direct's service and support and Honeywell's outstanding technology and global connectivity."

Honeywell International is a \$38 billion diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell's shares are traded on the New York, London and Chicago Stock Exchanges. For additional information, please visit www.honeywell.com.

Based in Phoenix, Honeywell's \$12 billion aerospace business is a leading global provider of integrated avionics, engines, systems and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space and airport operations.
